1. Overview of the User Journey

This map outlines the path Rajesh takes when interacting with the OptiCrop system, from soil sampling to harvesting, highlighting key actions, touchpoints, pain points, and system opportunities:

Phase	Actions	Touchpoints	Pain Points	System Opportunities
1. Sampling	Collects soil, obtains NPK & pH levels.	Local testing lab	Slow lab reports, manual record-keeping.	Provide advice on how to sample so
2. Accessing	Navigates to OptiCrop portal, authenticates.	Web Portal Login	Unstable network, authentication hurdles.	Create lightweight glassmorphic res
3. Input	Inputs N, P, K, pH, temp, rainfall, and season.	Optimization Form	Form confusion, units mapping errors.	Add input validation and default plac
4. Predict	Submits inputs, gets crop recommendation & yield.	Results Panel	Slow calculations, complex statistics.	Return instant visual indicators and
5. Actions	Applies prescribed fertilizers, plants crop.	Field Application	Lack of step-by-step guidance.	Generate clear NPK corrective instr
6. Harvest	Grows crop, records final harvest yield.	Yield Log Form	Manual data entry, lack of incentive.	Incorporate harvest results to updat
